TEHAMA COUNTY
Flood Control and Water Conservation District

Public Webinar

Progress Update On Development of the GSP for the Red Bluff Subbasin

April 20, 2021

Welcome!

The meeting will begin shortly.

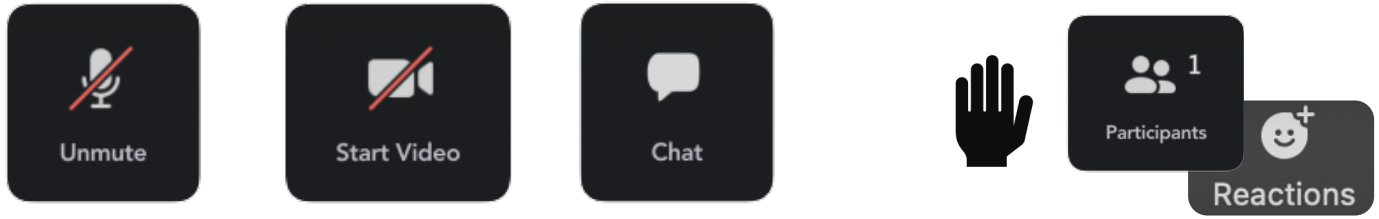

Technical Difficulties?

- Use the Zoom Chat,
- or email Stephanie Horii SHorii@cbi.org,
- or text: 408.768.9394

Instructions for Getting Started:

- ❑ **Use only one audio source** – either computer or phone.
- ❑ **Wear headsets / earbuds** to cut down on ambient noise.
- ❑ **Please MUTE yourself** at all times, except when speaking.
- ❑ **Orient yourself** to Zoom meeting controls:

Unmute/Mute | **Start Video** | **Zoom Chat** | **Raise Hand (via Participants or Reactions)**

How you can participate today:

- **Verbal:** Get into the queue w/ Raise Hand function
- **Written:** Submit questions in Chat Box

COMMON TERMS

SGMA *("Sigma")*: Sustainable Groundwater Management Act • **GSA:** Groundwater Sustainability Agency • **GSP:** Groundwater Sustainability Plan

Zoom Orientation

Introduction to Zoom Webinar Interface and Today's Meeting Process

Stephanie Horii, Consensus Building Institute (CBI)

Meet the Project Team

"Hosts/Co-Hosts: – Project Team

- **Convener: Tehama County GSA**
  - Ryan Teubert, GSA Project Manager
  - Nichole Bethurem
- **Technical Consultant:** Luhdorff & Scalmanini, Consulting Engineers (LSCE)
  - Eddy Teasdale
- **Facilitation/Tech Support:** Consensus Building Institute (CBI)
  - Stephanie Horii

CBI

Note: The meeting will be recorded and posted to the website: TehamaCountyWater.org

Verbal Questions

Raise Hand

If participating through Zoom:

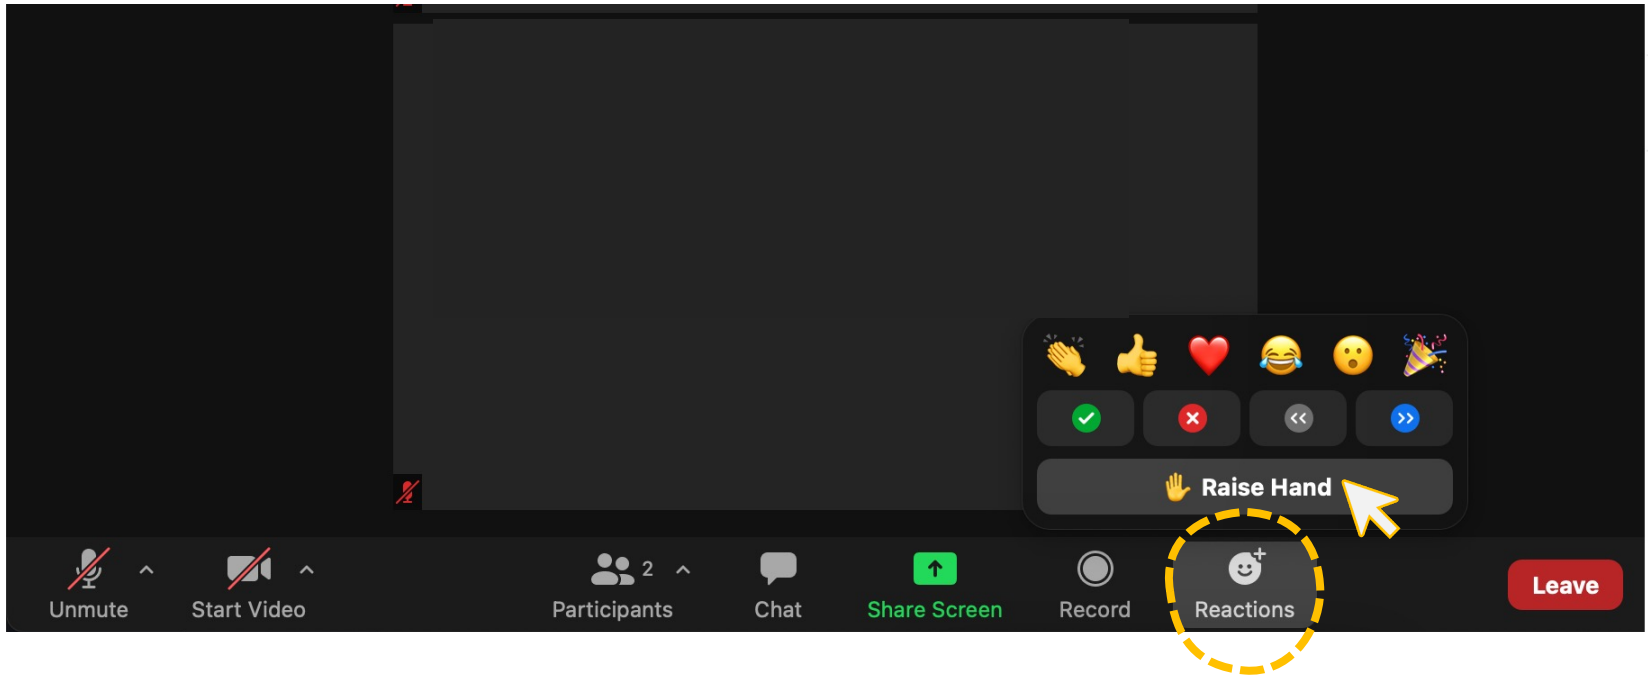

"Raise Hand" to speak

If dialing in by phone only:

Press *9 to "Raise Hand"

We will let you know when it is your turn to speak and can unmute yourself

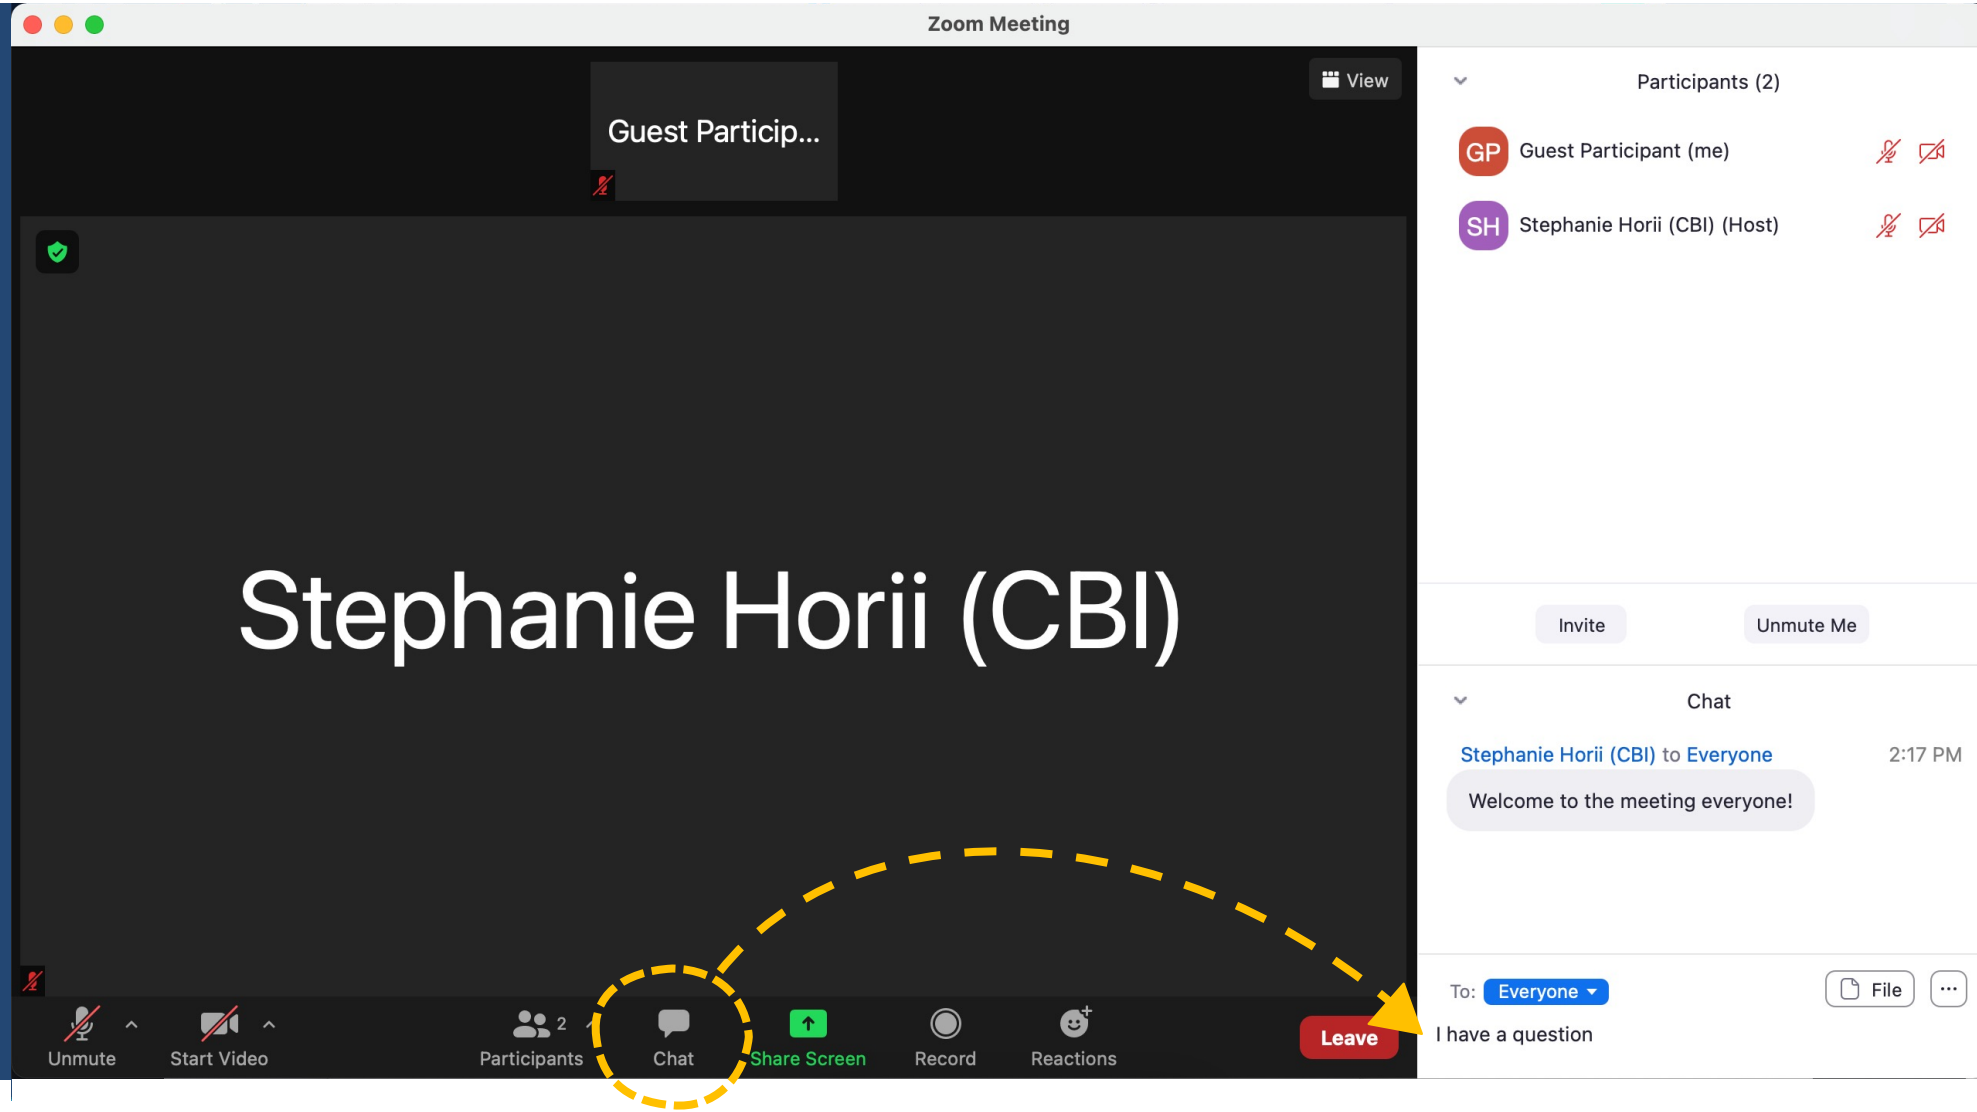

*(Phone-Only Folks – Press *6 to unmute/mute)*

(older versions of Zoom may require using the Participants button to find the Raise Hand icon)

Written Questions

Zoom Chat

Calling in by phone only? email SHorii@cbi.org or text: 408.768.9394

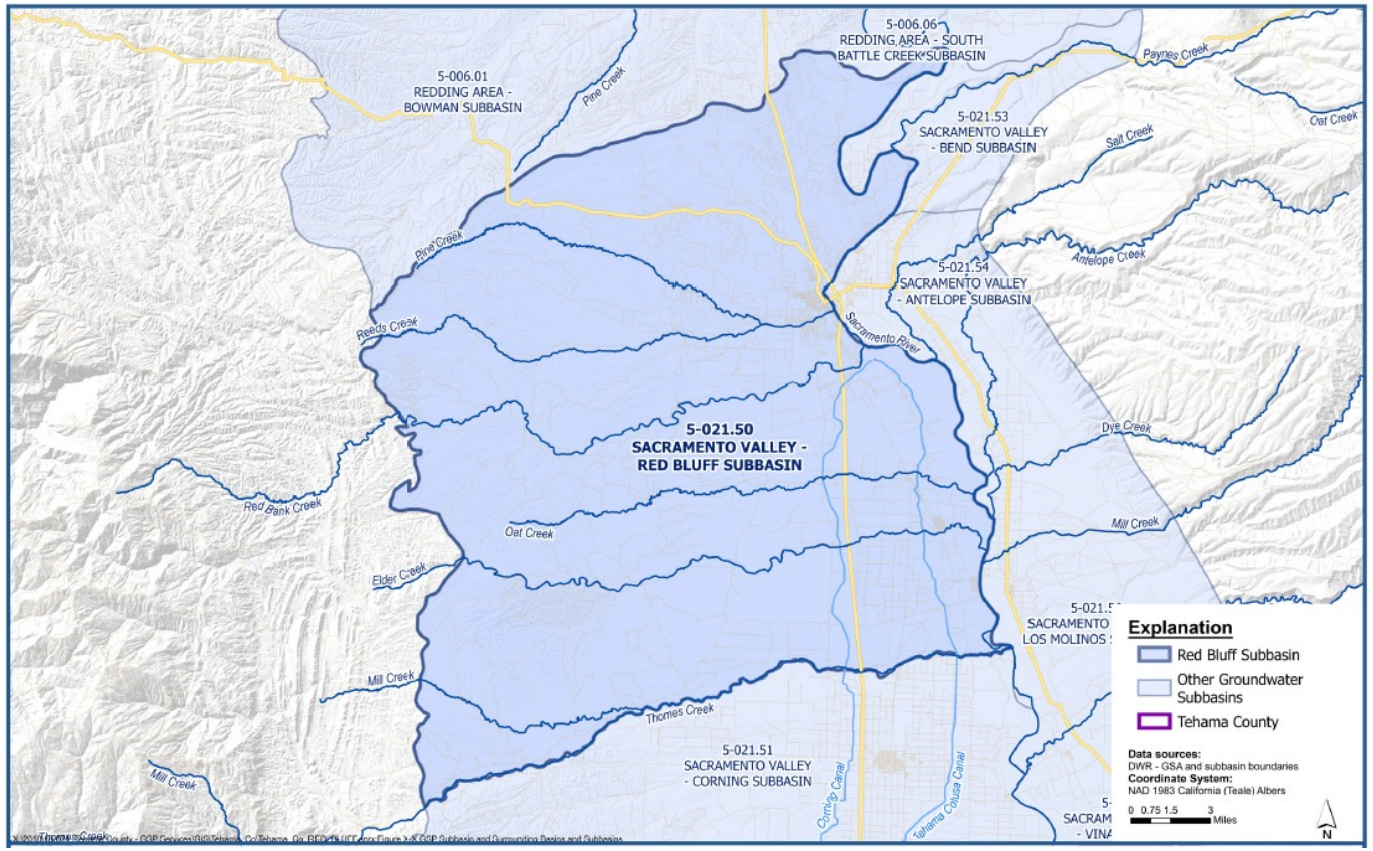

Participating in the Workshop

- “Raise Hand” for Verbal Questions
- Zoom ”Chat” to submit written Questions
- “Start Video” for more interactive experience
- Please keep yourself on MUTE at all times
- Focus on Topic
- Honor Time
- Tech-Adaptive Mind Set

Presentation Outline

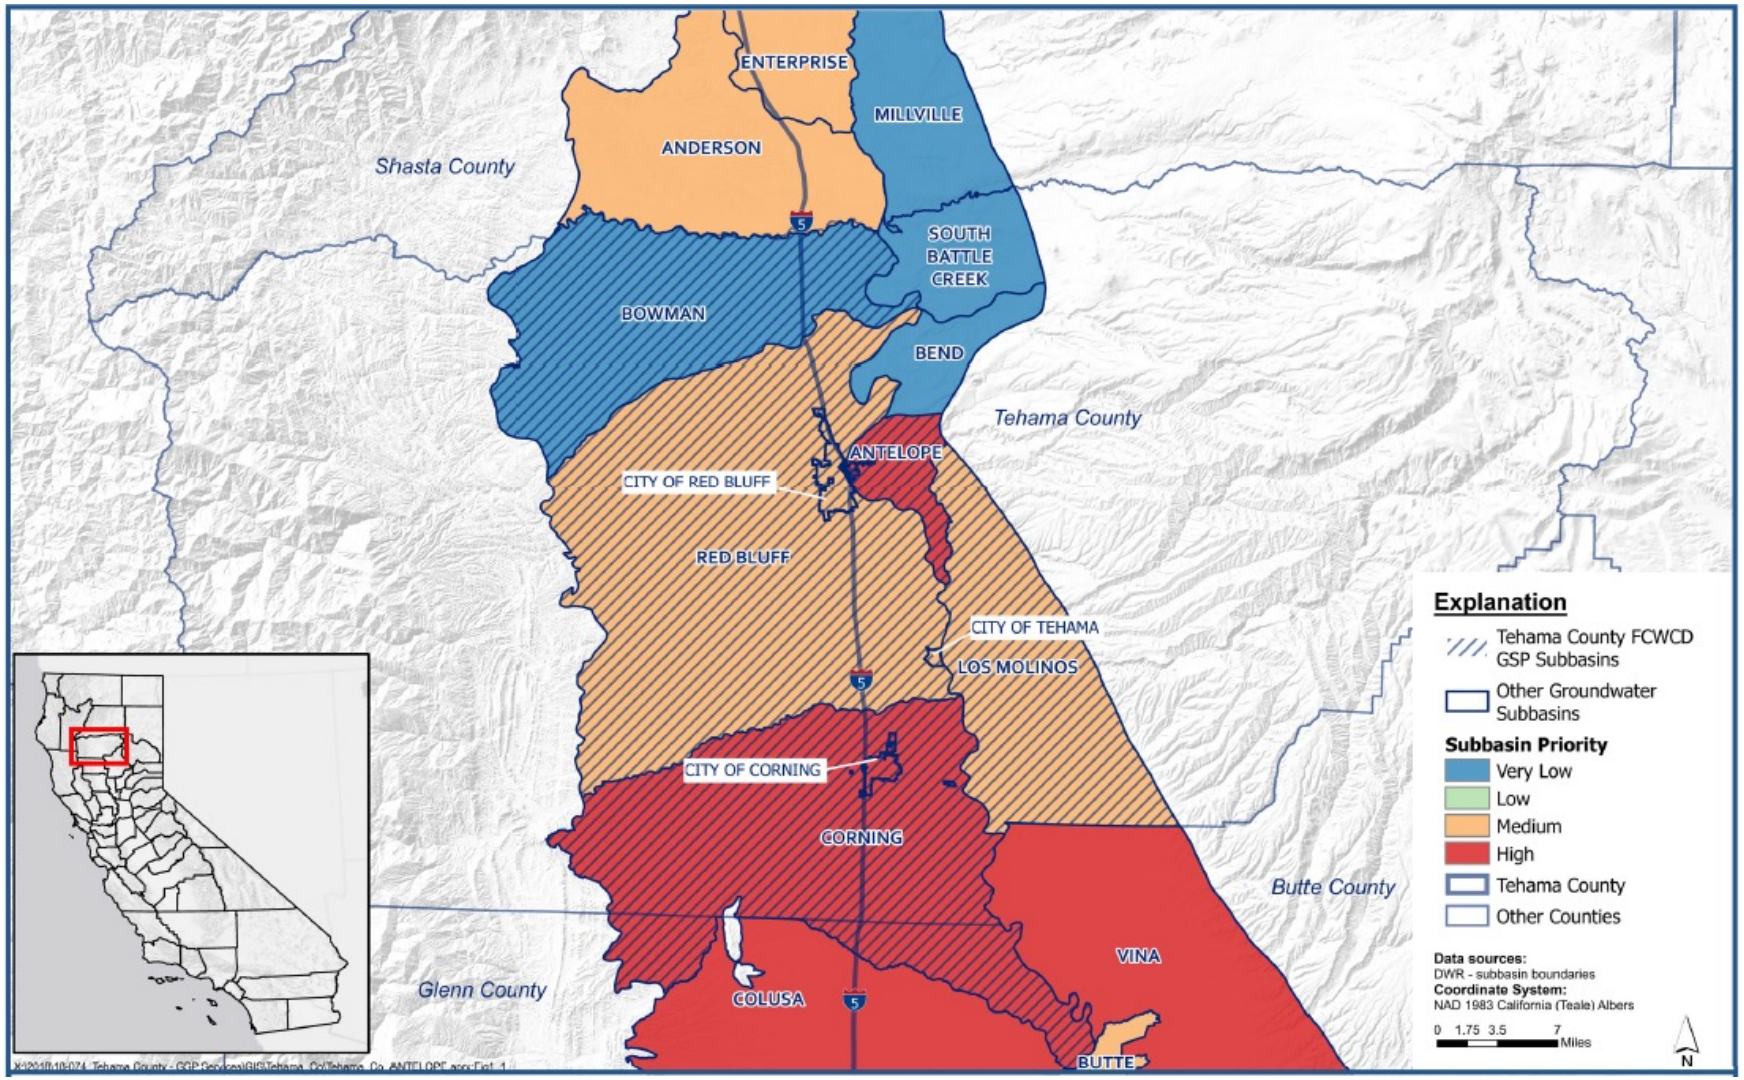

TEHAMA COUNTY
Flood Control and Water Conservation District

- Brief Summary of SGMA
- Outreach and Engagement
- Interbasin Coordination
- Progress on GSP Chapters
- Chapter 2 – Basin Setting and Hydrogeologic Conceptual Model (HCM)
- Chapter 3 – Sustainable Management Criteria (SMC)
- Overview of Chapter 4 & 5
- Other Activities
- Next Steps

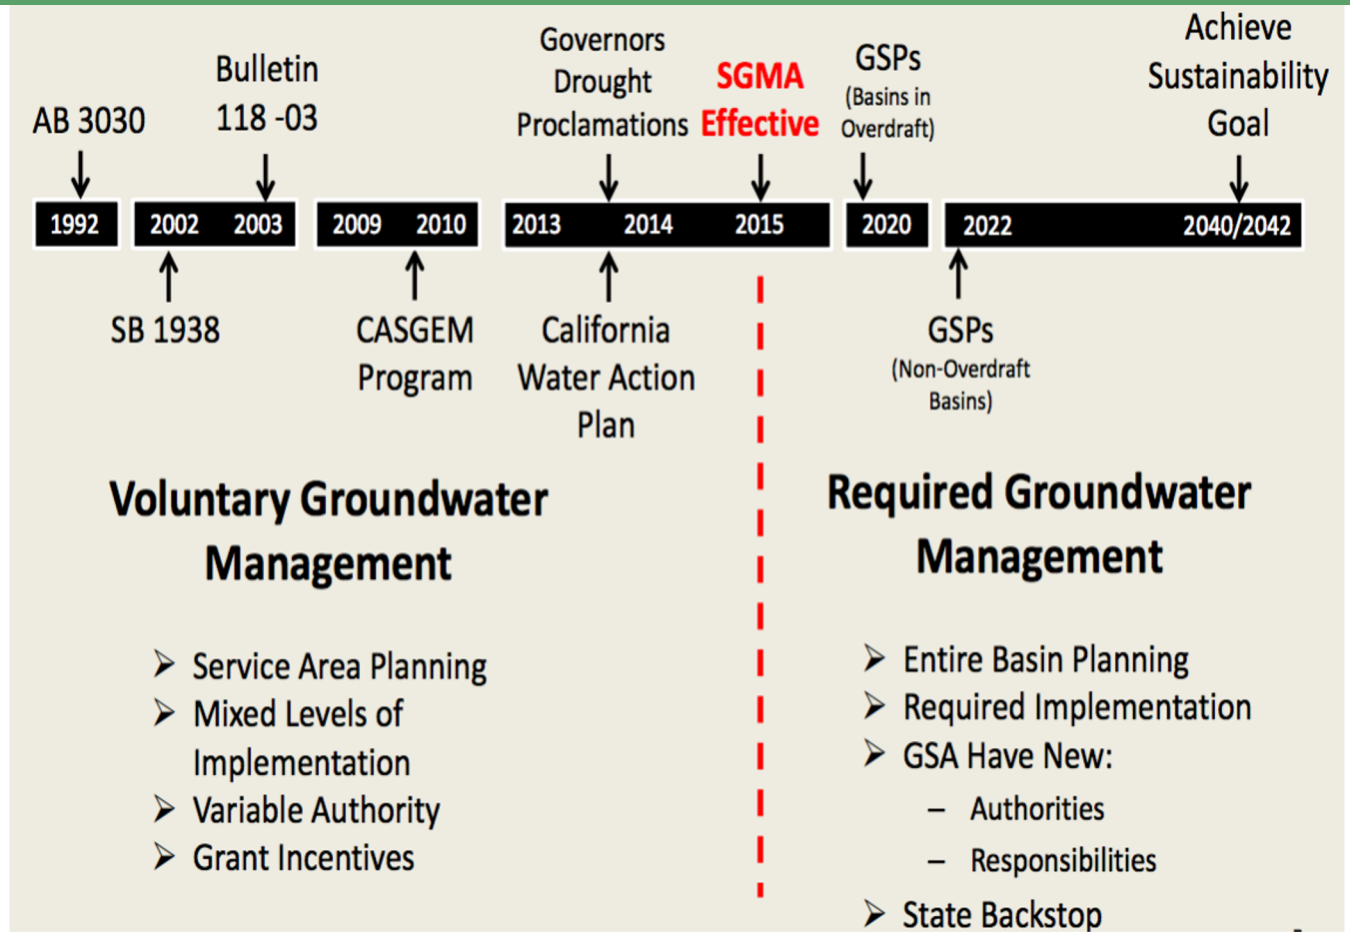

Red Bluff Subbasin

TEHAMA COUNTY
Flood Control and Water Conservation District

Groundwater Management in California

- California is the last western state to adopt statewide groundwater regulations
- Recent multi-year drought led California to regulate groundwater for the first time

The Sustainable Groundwater Management Act (SGMA) will help to ensure groundwater resources are available for the future.

Sustainable Groundwater Management Act

- SGMA established robust framework for sustainable management of groundwater resources for the first time in CA's history
- Enacted in September 2014, and implementation began January 1, 2015
- Requires groundwater sustainability plans in 94 medium and high priority basins
- Recognizes management is most effective when done at the local level by local agencies with adequate info, tools, etc.
- Creates State "backstop"
- Defines timeframe for accomplishing goals

Local Control

"A central feature of these bills is the recognition that groundwater management in California is best accomplished locally."

Governor Jerry Brown, September 2014

Stakeholder Coordination General Update

TEHAMA COUNTY

Tehama County SGMA eNewsletter - Spring 2021

This is a quarterly eNewsletter for implementing the Sustainable Groundwater Management Act (SGMA) in Tehama County.

In this newsletter:

- **EVENT ANNOUNCEMENT** -- Upcoming April public webinars - Register today!
- **NEW** -- Domestic Well Owner Survey
- SGMA 101 - New to SGMA?
- Planning Updates - Groundwater Sustainability Plans (GSPs)
- Data and Tech Update - Integrated Hydrologic Model and Database Management System
- Updates on Surface Water and Groundwater Conditions
- Corning Subbasin GSP Update
- Upcoming Meetings

Save the Dates | Online Public Workshops
April 19-22, 2021

Managing our local groundwater sustainably in Tehama County

TEHAMA COUNTY
FLOOD CONTROL AND WATER CONSERVATION DISTRICT

The **Tehama County Flood Control and Water Conservation District** invites you to participate in an online, interactive public workshop to learn and share input about sustainable groundwater management planning efforts in Tehama County subbasins.

What will be discussed?

- Brief review and updates on recent SGMA efforts in the County
- Plan Area and Basin Setting description, specific to each subbasin (*refer to map on the following page*)
- Introduction to Sustainable Management Criteria

Why is this important?

California enacted the **Sustainable Groundwater Management Act (SGMA)** in 2014 to better manage our groundwater over the long term. SGMA requires that groundwater basins be managed by Groundwater Sustainability Agencies (GSAs), and GSAs must develop Groundwater Sustainability Plans (GSPs) that provide a detailed roadmap for reaching long-term sustainability. In Tehama County, the Flood Control and Water Conservation District serves as the GSA for subbasins within the County boundaries.

GSPs must assess groundwater conditions and articulate how groundwater management will avoid adverse impacts of groundwater overdraft. **Local groundwater users have the opportunity to inform how groundwater can be sustainably managed in Tehama County subbasins.**

April 19-22
6:00-7:30 pm

Register to attend a basin-specific webinar:

- **April 19 | Bowman Subbasin**
  bit.ly/SGMA-Mtg_April-19_Bowman
- **April 20 | Red Bluff Subbasin**
  bit.ly/SGMA-Mtg_April-20_RedBluff
- **April 21 | Antelope Subbasin**
  bit.ly/SGMA-Mtg_April-21_Antelope
- **April 22 | Los Molinos Subbasin**
  bit.ly/SGMA-Mtg_April-22_LosMolinos

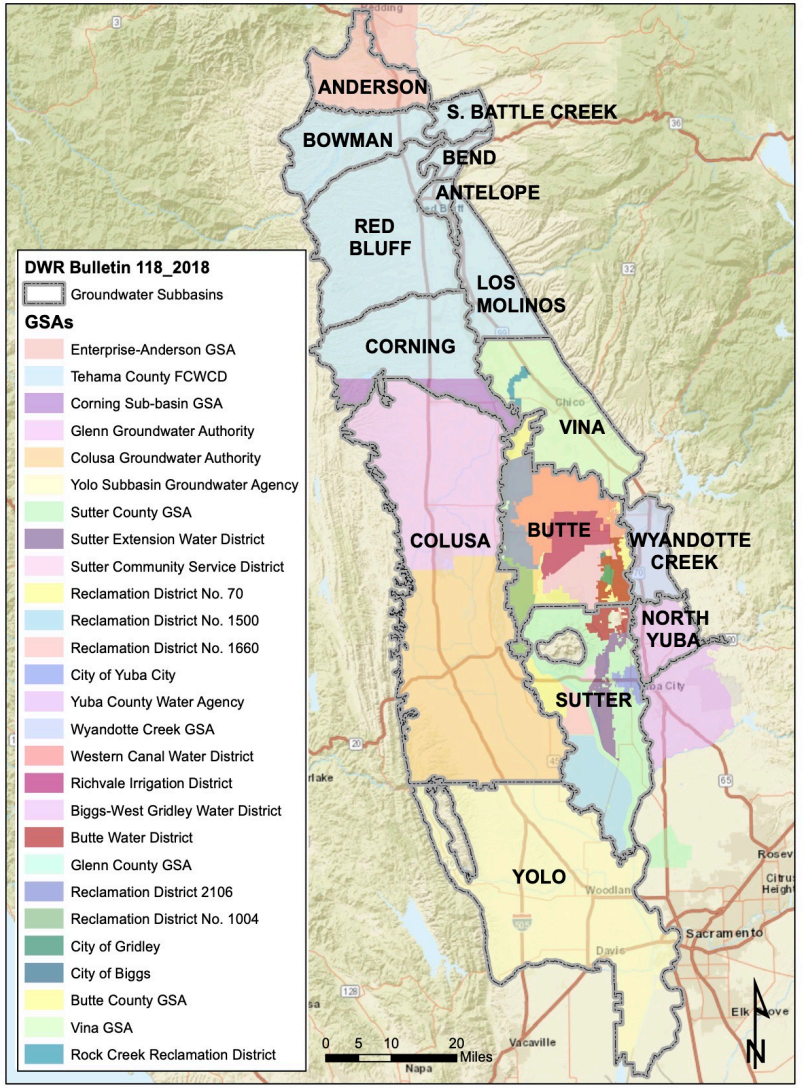

NOTE: When you register, you will receive a confirmation email that will include instructions on how to join the webinar, including dial-in-by-phone information.

Webinars will be recorded and posted to the District's website for future viewing.

Inter-basin Coordination

TEHAMA COUNTY
Flood Control and Water Conservation District

- Northern California Water Agencies
- Corning Subbasin
- Northern Sacramento Valley
- Coordination with Butte County
- Coordination with Shasta County
- Sacramento River Corridor Coordination

Tehama County Subbasins Groundwater Sustainability Plans

TEHAMA COUNTY
Flood Control and Water Conservation District

Describe the Basin Conditions
Plan Area, Subbasin Setting & Water Supplies

What water sources are used in the basin and what are the basin conditions related to those uses?

Define Basin Sustainability
Sustainable Management Criteria & Monitoring

What is sustainable groundwater management?

Develop Projects/Management Actions & Implementation Plans

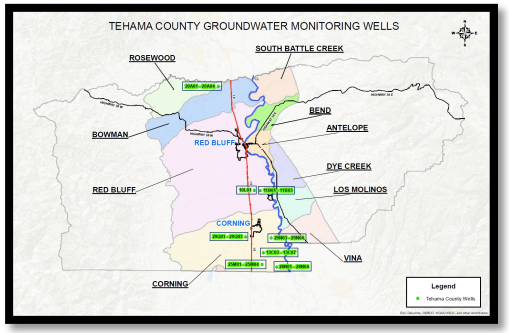

How can we ensure groundwater sustainability?

Develop & Adopt GSPs
Submit GSP to DWR: January 31, 2022

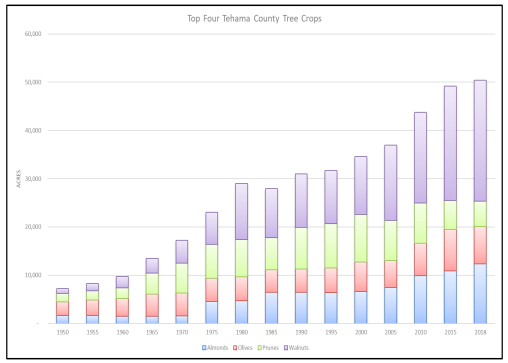

Will this plan meet our sustainability goals?

GSP Section Preparation

TEHAMA COUNTY
Flood Control and Water Conservation District

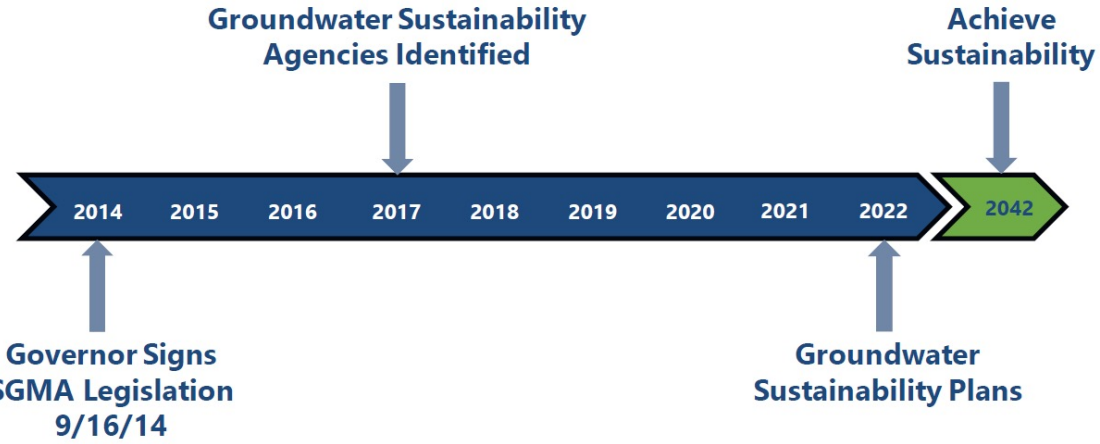

- A friendly, “good read”
- Supported by Technical Memorandums and other appendices
- Draft Sections: Periodic Review in Advance of Full Draft GSP Delivery

GSP Chapter Development

TEHAMA COUNTY
Flood Control and Water Conservation District

- Chapter 1 – Introduction (Complete)
- Chapter 2 – Complete
  - Chapter 2A – Plan Area
  - Chapter 2B – Basin Setting
  - Chapter 2C – Current & Historical Groundwater Conditions
- Chapter 3 – SMCs (in development)
- Chapter 4 – Projects and Management Actions
- Chapter 5 – GSP Implementation

TIMELINE FOR SUSTAINABLE MANAGEMENT

GSP Chapter 1 Development

TEHAMA COUNTY
Flood Control and Water Conservation District

Tehama County Integrated Hydrologic Model:

- Historical Water Budget
  - 1990-2018
- Current Water Budget
  - Average of three most recent water years (WY 2016-2018)
- Project Water Budget
  - 50-year hydrology
  - Reflects historic wet and dry sequences

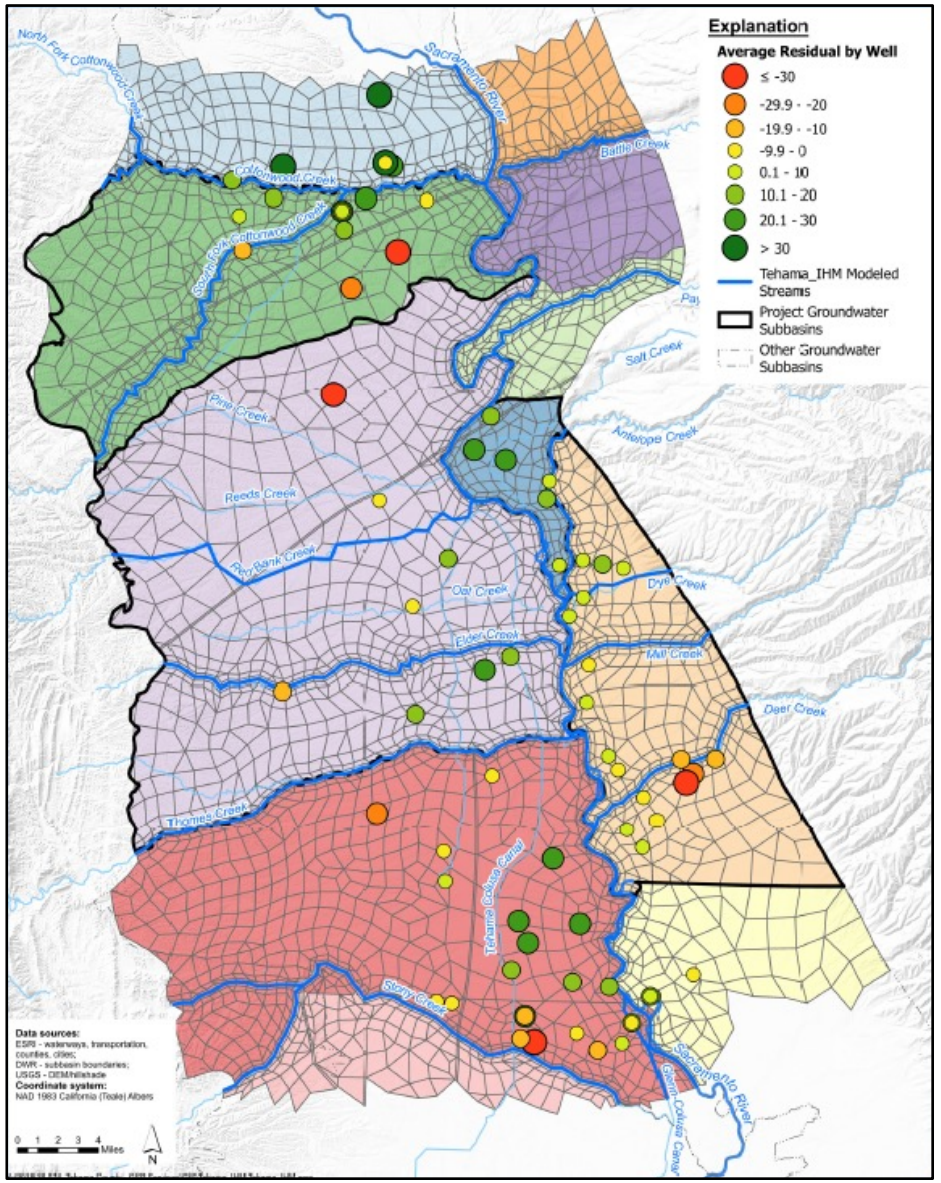

Tehama County Integrated Hydrologic Model:
Model Development

- Refinements
  - Extend through WY 2018
  - Refine textural model
  - Refine Root Zone component
  - Refine SW diversions
  - Refine vertical discretization of pumping
  - Refine initial conditions and boundary conditions

Tehama County Integrated Hydrologic Model:
Model Calibration – Water Levels

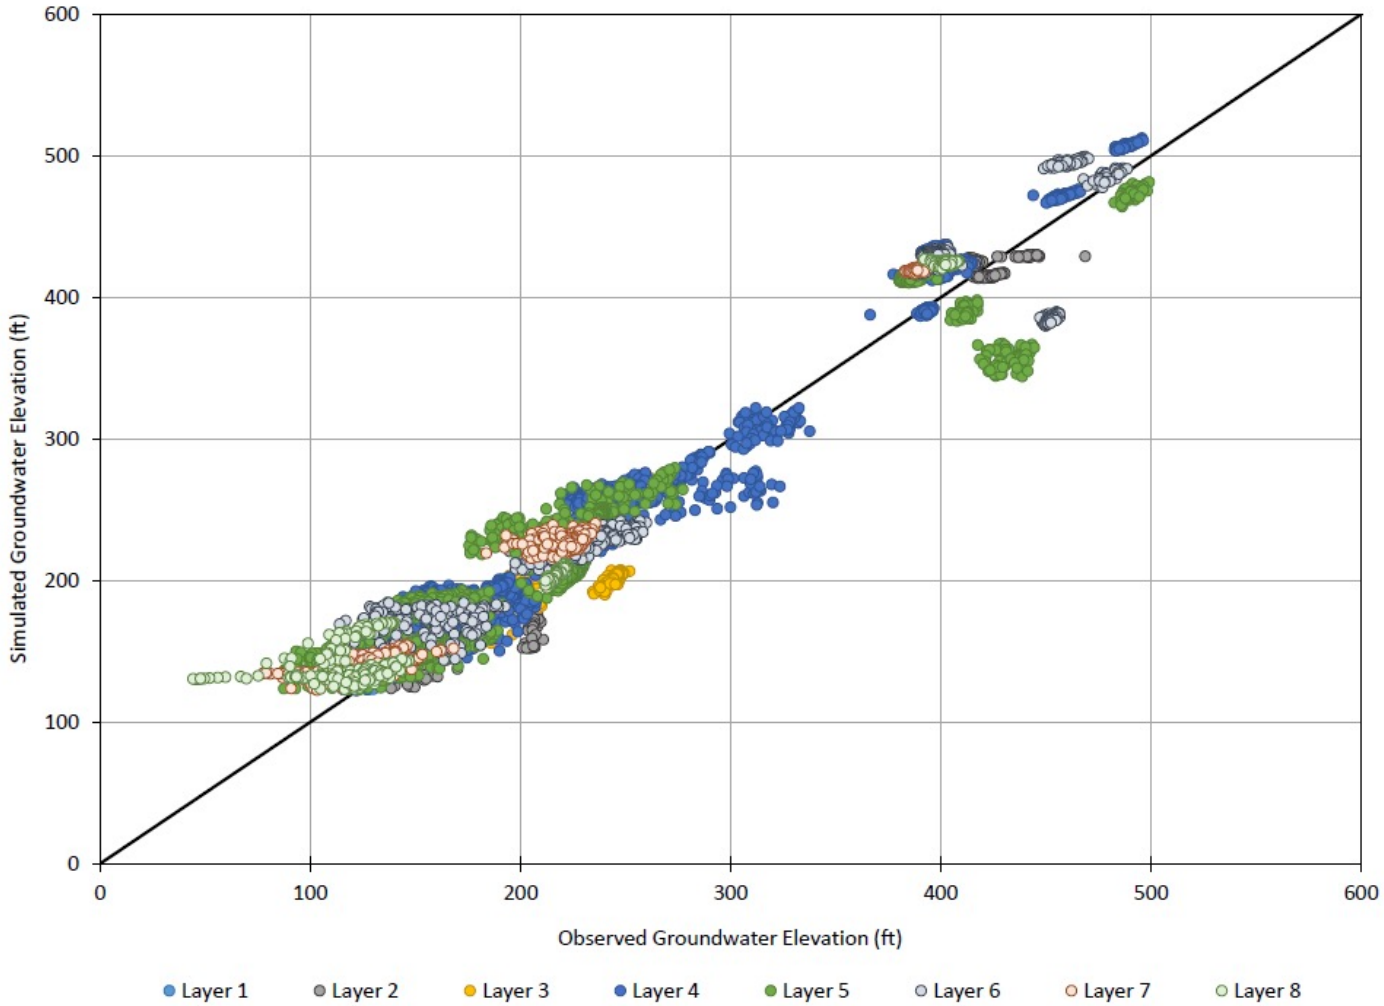

- Water Level Calibration
  - Select calibration wells
  - Evaluate residual water levels (simulated minus observed)
  - Calculate model statistics
    - Target RSME: 0.10-0.15
    - Target Correlation Coefficient: 1.00

Calibration Statistics:	
Mean Residual	5.21
Absolute Mean Residual	15.73
Normalized RSME	0.12
Correlation Coefficienct	0.98

Annual Groundwater Storage Change[1]	*-22,800*	*-21,400*	*20,900*	*-103,900*	*99,500*

[1] Annual storage change volumes rounded to 100 af.
Note: positive values indicate inflows/increasing storage, negative values indicate outflows/decreasing storage.

Proposed SMC Development Process

TEHAMA COUNTY
Flood Control and Water Conservation District

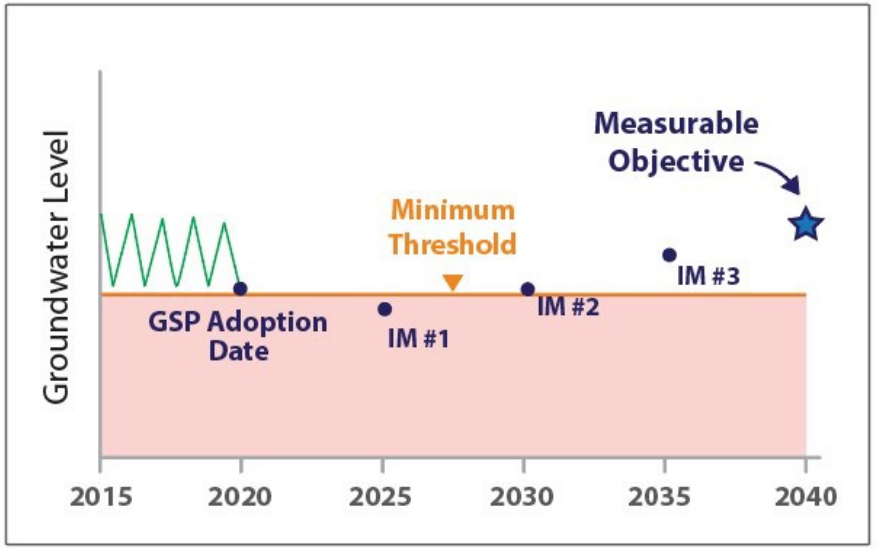

The charge under SGMA is to build a “thermometer” for each of the six groundwater sustainability indicators

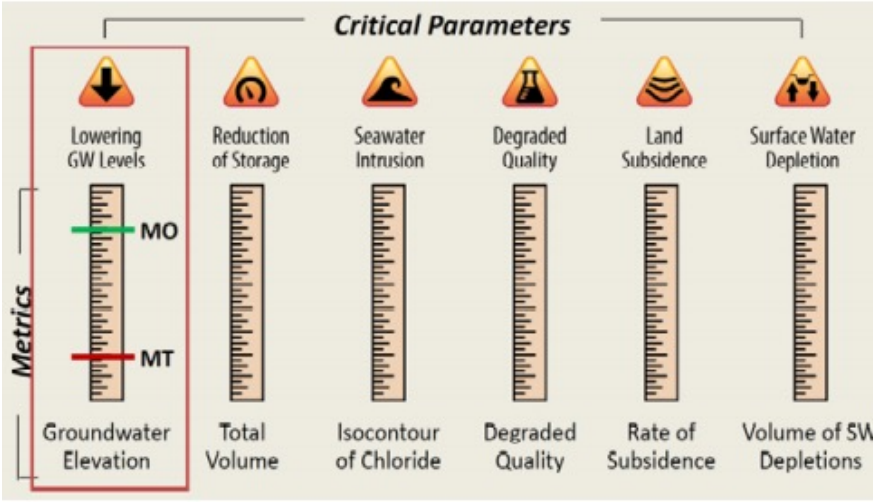

1. Define what is healthy/sustainable
2. Define what is unhealthy/unsustainable
3. Determine what to do when not healthy or close to not healthy

GSP Chapter 3 Sustainable Management Criteria

TEHAMA COUNTY
Flood Control and Water Conservation District

1. Sustainable Management Goal
2. Measurable Objectives
3. Minimum Thresholds
4. Undesirable Results
5. Monitoring Network

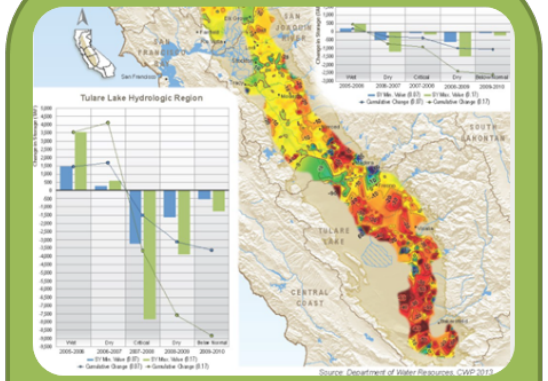

Sustainability Indicator Examples

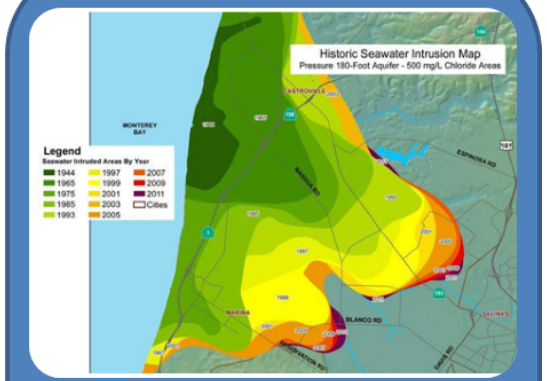

TEHAMA COUNTY
Flood Control and Water Conservation District

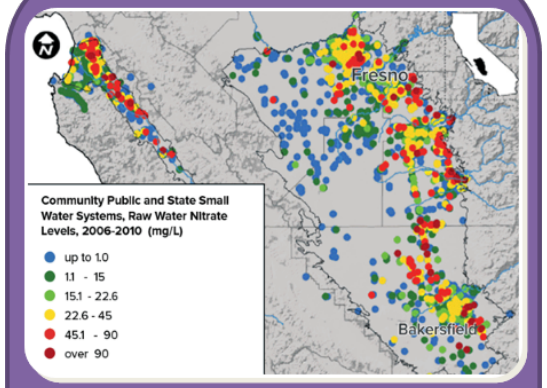

Lowering of GW Levels

Reduction of GW Storage

Seawater Intrusion

Degraded Water Quality

Land Subsidence

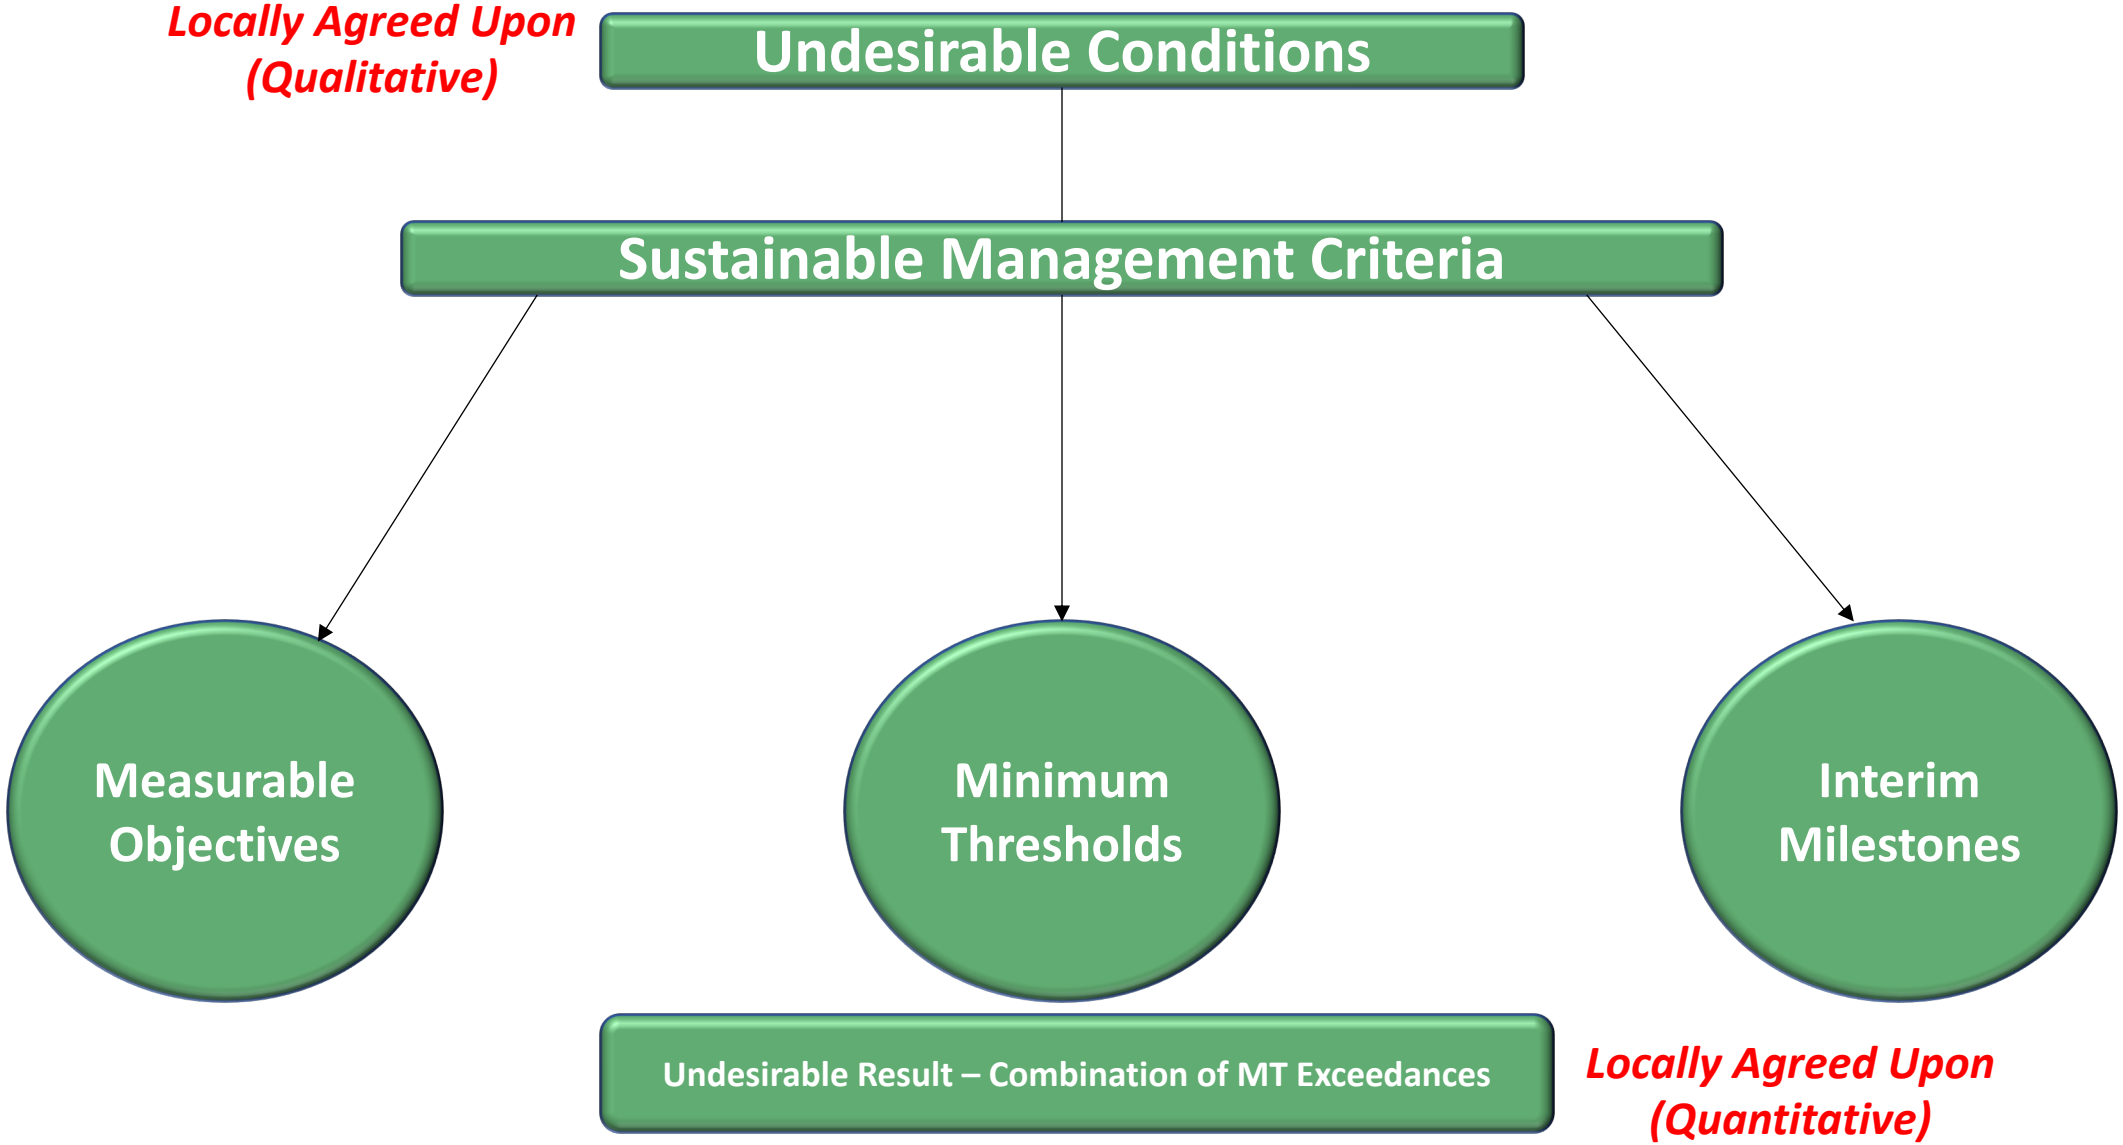

Depletion of Inter-connected Streams

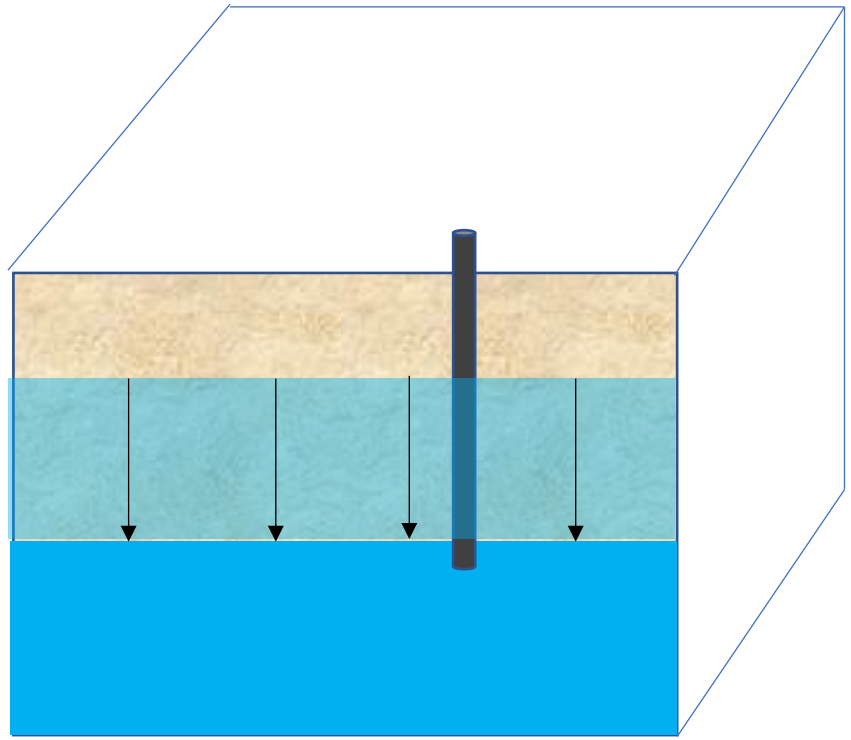

Source: DWR

Sustainable Management Criteria (SMC)

TEHAMA COUNTY
Flood Control and Water Conservation District

Chronic Lowering of Groundwater Levels

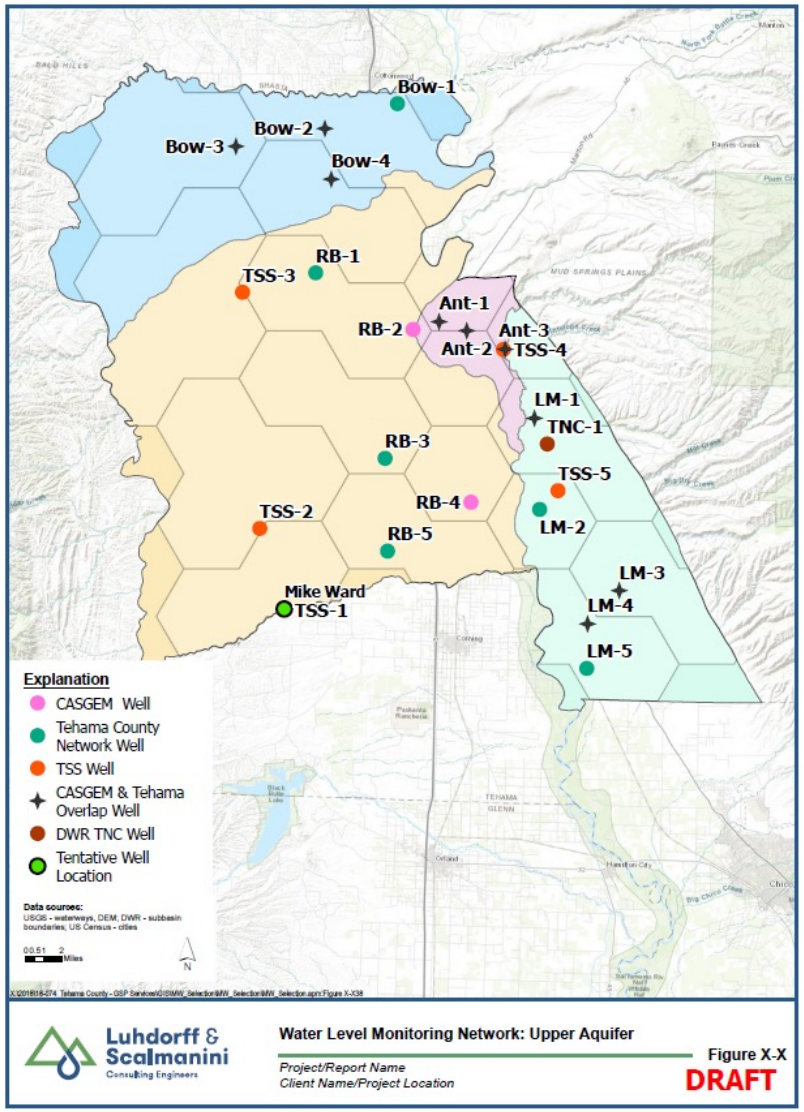

- Continued lowering of groundwater levels can lead to undesirable results for all beneficial users

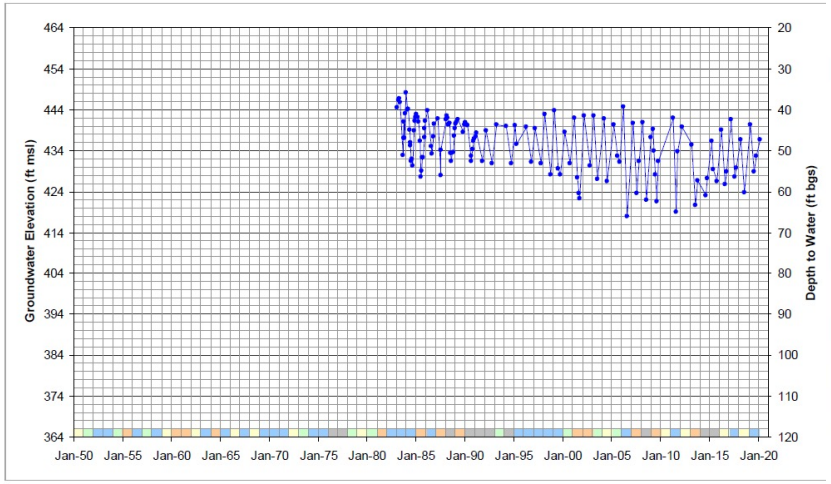

- Overdraft during a period of drought is not sufficient to establish a chronic lowering of groundwater levels if extractions and recharge are managed as necessary to ensure that reductions during a period of drought are offset by increases during other periods

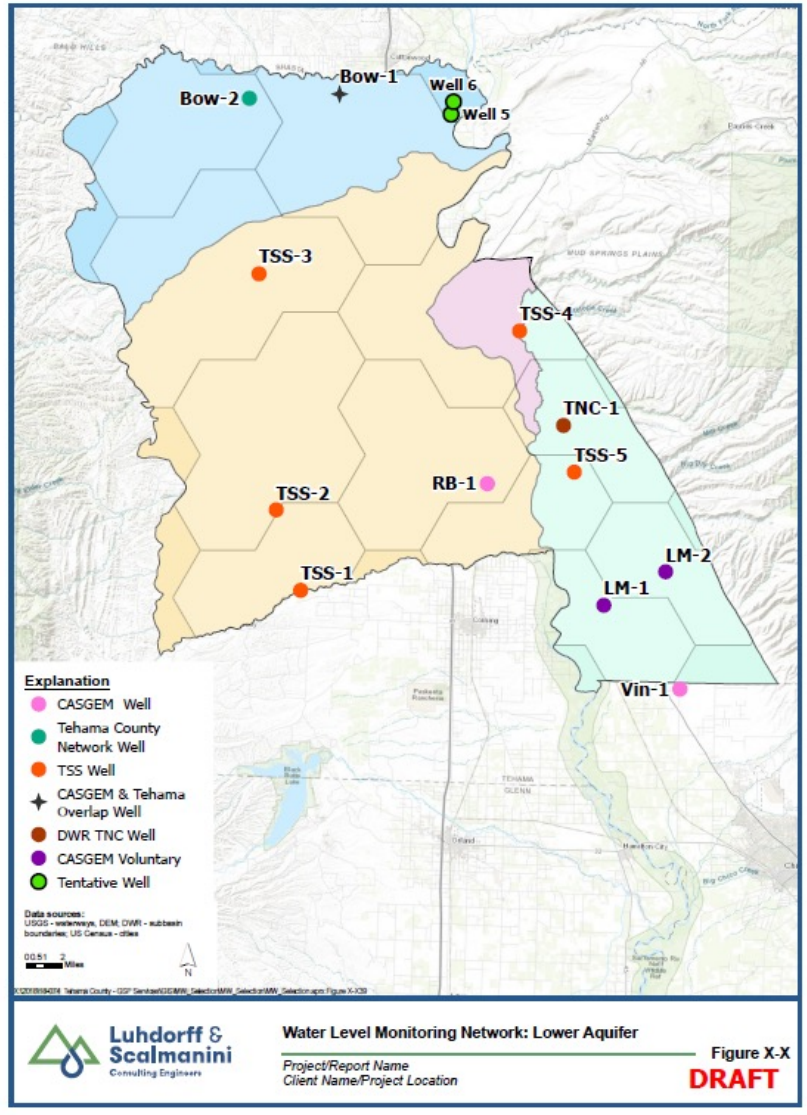

GSP Chapter 3 Sustainable Management Criteria

TEHAMA COUNTY
Flood Control and Water Conservation District

Abbreviated Well Name: 05G2 | Subbasin: Red Bluff | Well Depth (ft): 260 | Well Type: Domestic
Well Name: 27N04W05G002M | Aquifer: Upper | Screen Depth (ft bgs): 231 - 251

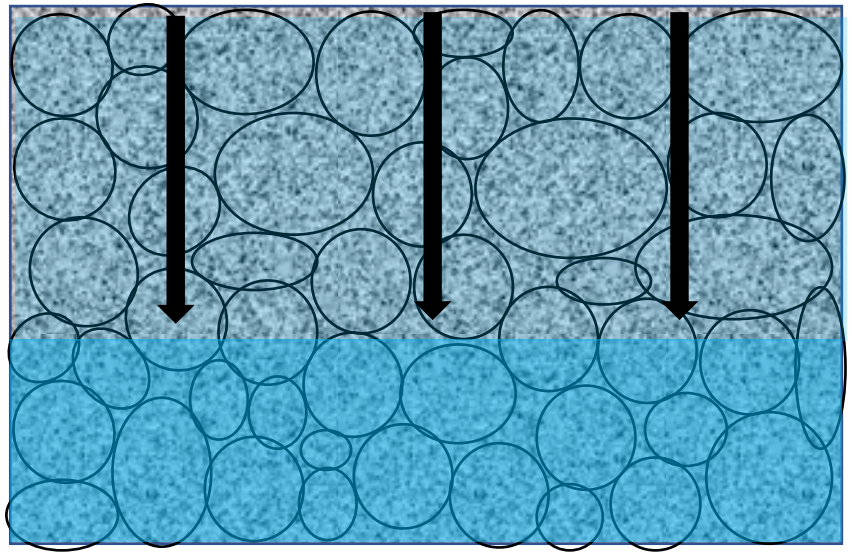

Reduction of Groundwater Storage

TEHAMA COUNTY
Flood Control and Water Conservation District

- Decline in groundwater storage would result in a decreased availability of groundwater for agriculture, municipal, industrial and domestic uses.

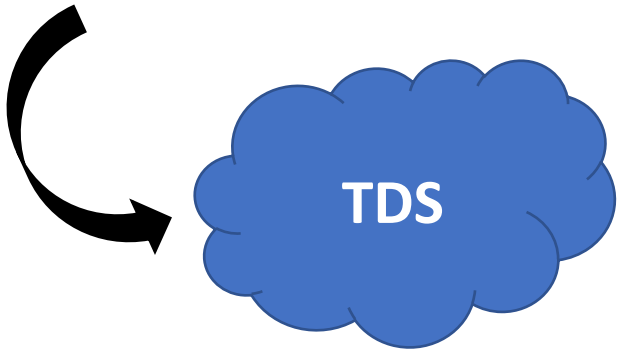

- Projects and/or Management actions would be required to mitigate these reductions in storage.

Degradation of Water Quality

TEHAMA COUNTY
Flood Control and Water Conservation District

- Degradation of water quality is considered significant and undesirable if the magnitude of degradation renders groundwater in pre-existing wells unusable without management actions

- Within these four subbasins, TDS will be used as indicators for water quality degradation

Total Dissolved Solids (TDS)

Land Subsidence

TEHAMA COUNTY
Flood Control and Water Conservation District

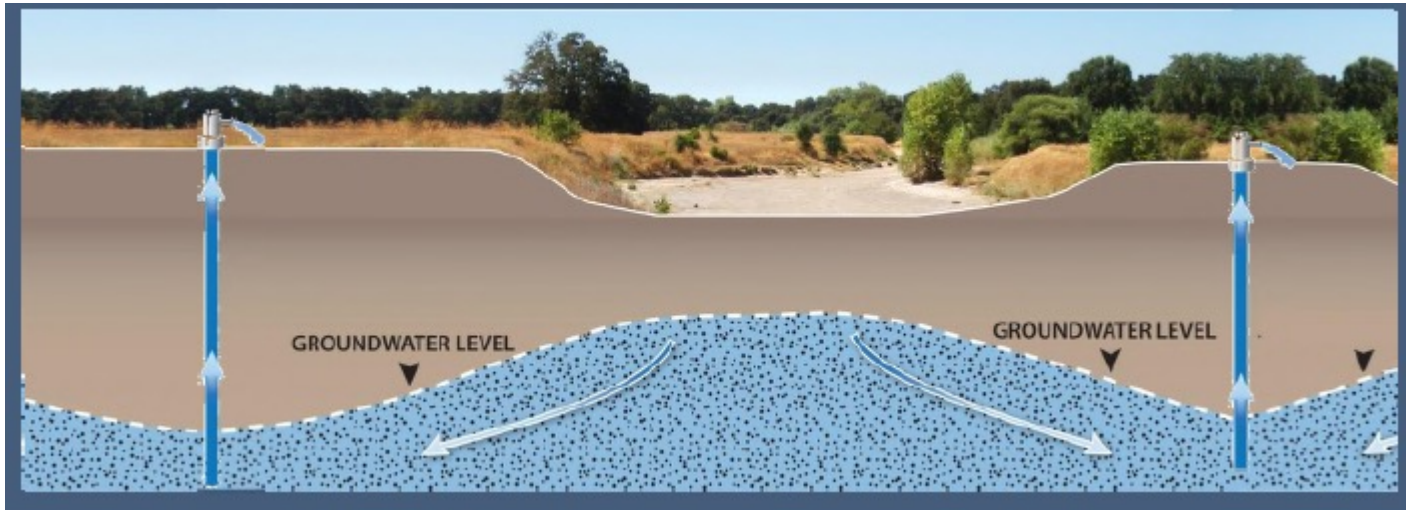

- Historically, Tehama County has experienced minor levels of subsidence

- Typically (Not the case in Tehama County), in areas near significant infrastructure minimal amounts of additional subsidence could be significant and unreasonable due to the susceptibility of infrastructure to subsidence

Depletion of Inter-Connected Surface Water

- Lowered groundwater table (from pumping) impacts groundwater dependent ecosystems
- Areas where DTW>30 feet bgs are not considered GDEs
- Areas where DTW <30 feet are considered GDEs

Depth to Water (DTW)
Below Ground Surface (BGS)
Groundwater Dependent Ecosystems (GDE)

GSP Chapter 4 Projects and Management Actions

TEHAMA COUNTY
Flood Control and Water Conservation District

- Projects and management actions may have to be developed to address sustainability goals, measurable objectives, and undesirable results within each of the subbasins in Tehama County, with a view towards reducing the potential socioeconomic impacts associated with actions required to sustainability manage the Subbasins.
- Potential PMAs may fall under several categories, including but not limited to the following:
  - Recharge projects
  - Supply augmentation projects
  - Water conservation projects
  - Projects to reduce non-beneficial consumptive use
  - Groundwater pumping allocations
  - Monitoring programs (groundwater pumping, water levels, stream flows, etc.)

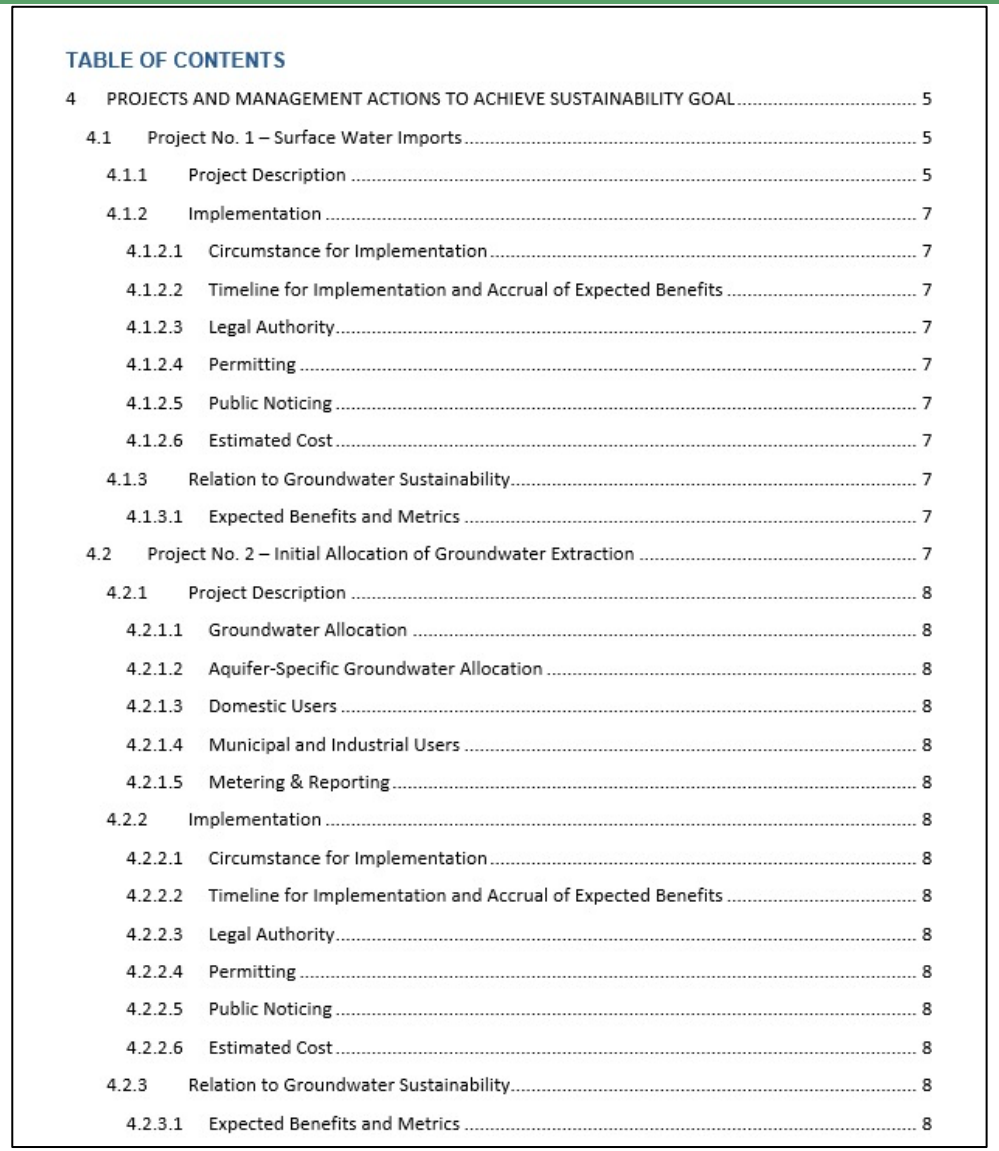

TABLE OF CONTENTS

4 PROJECTS AND MANAGEMENT ACTIONS TO ACHIEVE SUSTAINABILITY GOAL 5
4.1 Project No. 1 – Surface Water Imports 5
4.1.1 Project Description 5
4.1.2 Implementation 7
4.1.2.1 Circumstance for Implementation 7
4.1.2.2 Timeline for Implementation and Accrual of Expected Benefits 7
4.1.2.3 Legal Authority 7
4.1.2.4 Permitting 7
4.1.2.5 Public Noticing 7
4.1.2.6 Estimated Cost 7
4.1.3 Relation to Groundwater Sustainability 7
4.1.3.1 Expected Benefits and Metrics 7
4.2 Project No. 2 – Initial Allocation of Groundwater Extraction 7
4.2.1 Project Description 8
4.2.1.1 Groundwater Allocation 8
4.2.1.2 Aquifer-Specific Groundwater Allocation 8
4.2.1.3 Domestic Users 8
4.2.1.4 Municipal and Industrial Users 8
4.2.1.5 Metering & Reporting 8
4.2.2 Implementation 8
4.2.2.1 Circumstance for Implementation 8
4.2.2.2 Timeline for Implementation and Accrual of Expected Benefits 8
4.2.2.3 Legal Authority 8
4.2.2.4 Permitting 8
4.2.2.5 Public Noticing 8
4.2.2.6 Estimated Cost 8
4.2.3 Relation to Groundwater Sustainability 8
4.2.3.1 Expected Benefits and Metrics 8

GSP Chapter 5 GSP Implementation

TEHAMA COUNTY
Flood Control and Water Conservation District

- GSP implementation, administration and management
- Implementation of the monitoring program
- Reporting, including annual reports and 5-year evaluations and updates
- Implementation of adaptive management strategies
- Funding

● Occurs once a year
● Occurs twice a year
● Occurs monthly
Ongoing

*All monitoring is reported on an annual basis

Other Activities– Financial Assurance Plan

The GSA intends to include a financial strategy as part of the 2022 GSP that provides sustainable GSA funding mechanisms to facilitate local control of groundwater resources.

1. Long Term GSA Funding
2. Long Term GSP Project Funding
3. Funding Options
4. Financial Assurance Plan
5. Post-GSP: GSA is financially sustainable

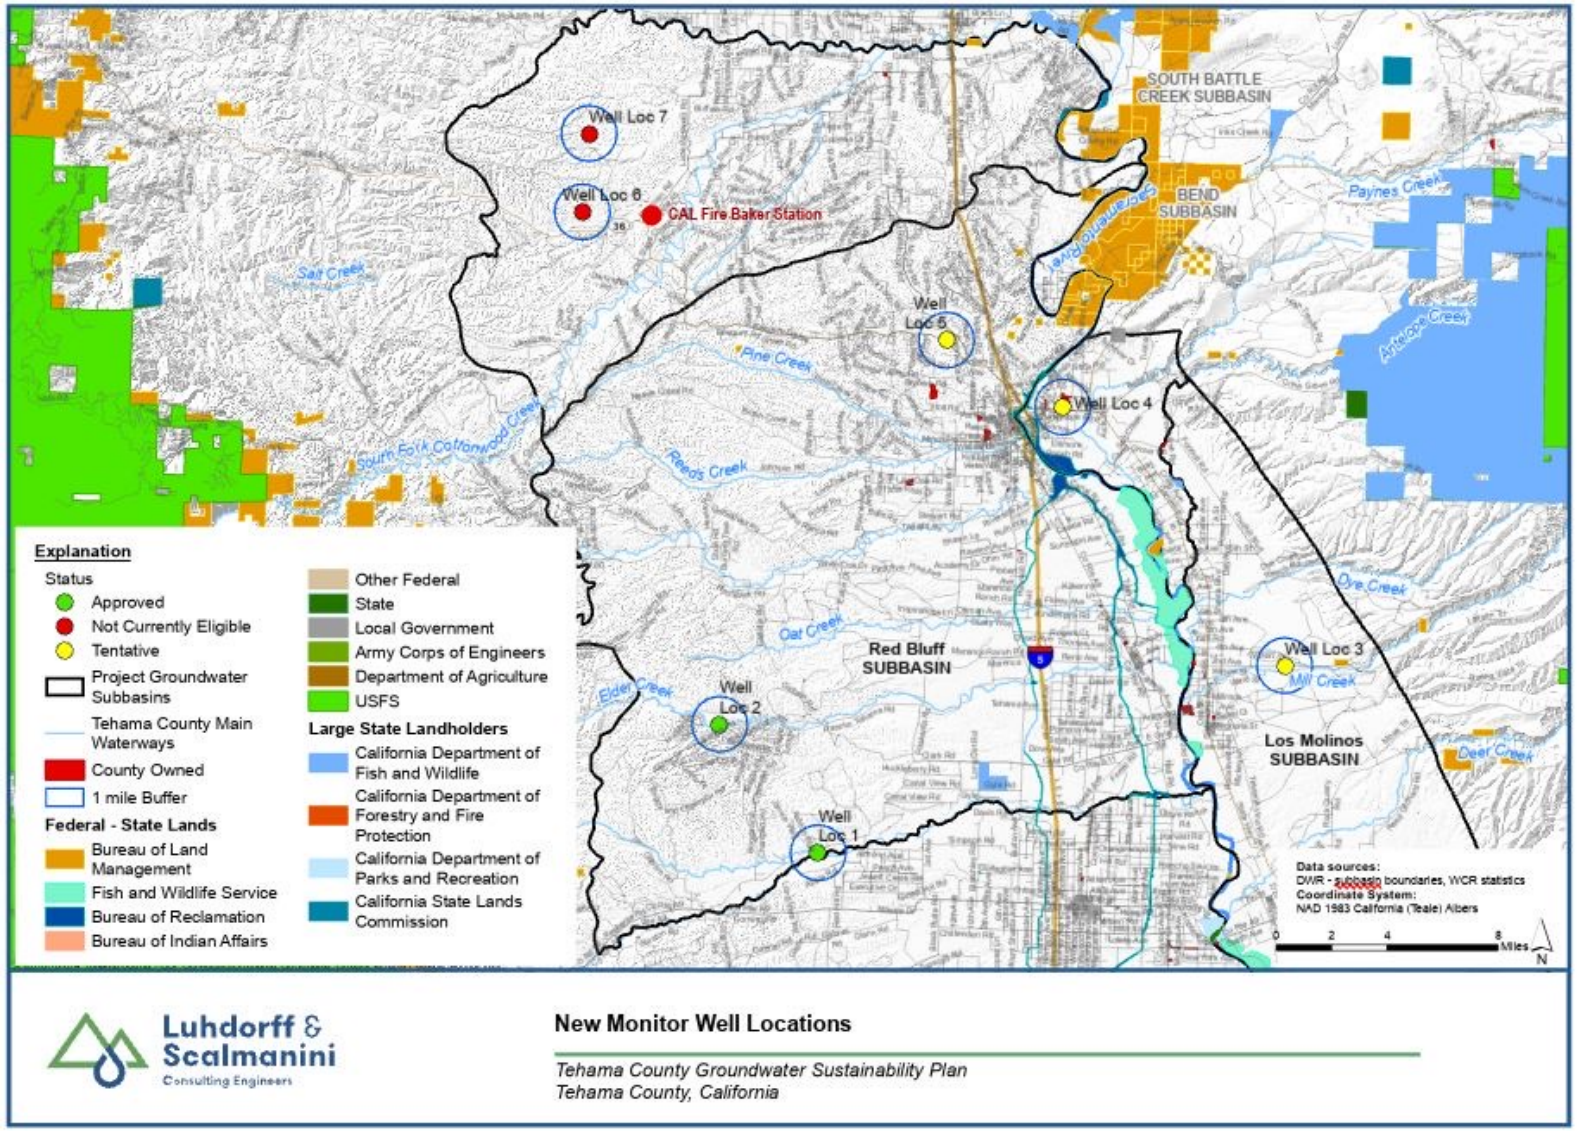

Financial Assurance Plan

GSA Financial Assurance Plan (Table of Contents)

- Section 1: Introduction
- Section 2: GSA Financial Requirements
- Section 3: GSA Other Sharing Arrangements
- Section 4: GSA Funding Sources
- Section 5: GSA Financial Strategies
- Section 6: GSA Financial Plan
- Appendix A: GSA Governance Agreement
- Appendix B: Funding source information

Other Activities – New Monitoring Wells

TEHAMA COUNTY
Flood Control and Water Conservation District

Luhdorff & Scalmanini
Consulting Engineers

New Monitor Well Locations

Tehama County Groundwater Sustainability Plan
Tehama County, California

Other Activities – Database Management System

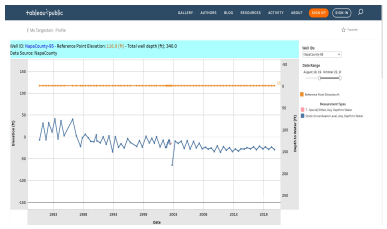

TEHAMA COUNTY
Flood Control and Water Conservation District

ArcGIS Online Map

Hyperlink

MS Access

Tableau

- Cost-effective
- Easy to learn and set up
- Integrates well with other systems
- Ability to create charts, data tables, reports
- Nearby subbasins like Corning use Access too
- Combine the strong mapping ability of ArcGIS with visualization ability of Tableau

What's Next?

TEHAMA COUNTY
Flood Control and Water Conservation District

1. Develop Projected Water Budgets
2. Agree on Sustainable Management Criteria
3. Finalize New Monitoring Well Locations
4. Develop Project and Management Actions (Chapter 4)
5. Additional Webinars Planned for Summer 2021
6. Current GSP sections 1 & 2 are available for review
7. Final complete draft available in September 2021

Q&A Session

TEHAMA COUNTY
Flood Control and Water Conservation District

How to Ask Questions

Zoom Options:

Verbal – "Raise Hand" to speak

Written – Use Chat Box

Calling-In Options:

*9 to Raise Hand

*(*6 to Unmute/Mute)*

E-mail shorii@cbi.org or

Text: 408.768.9394

Project Team

Tehama County GSA

- Ryan Teubert, GSA Project Manager

Technical Consultants, LSCE

- Eddy Teasdale

Facilitator, CBI

- Stephanie Horii

COMMON TERMS

SGMA *("Sigma")*: Sustainable Groundwater Management Act • **GSA:** Groundwater Sustainability Agency • **GSP:** Groundwater Sustainability Plan
